MESSAGE

Higher Education is an important means for the youth for achieving their aspirations in the present day "Knowledge Society". The State Govt. has accorded priority to education to enable realisation of the fullest potential of the students in the State.

The Department has the vision of involving all stake holders in planning and developing the sector in the State. Continuous efforts are being taken so that the education sector in the State develops as a model education sector in terms of access, quality, equity, employability and orientation towards research. Accordingly, the Higher Education Directorate is facilitating coordination between the activities of all Higher Education Institutions in the State, including Central Govt. Institutions, functioning in diverse domains ranging from General Education, Technical Education, Law education and Education in Arts & Music.

The State Government is committed to bringing quality higher education closer to the people. A substantial enhancement in capacity of the higher education sector will be achieved in the State when new General Degree Colleges and B.Ed. institutions in the unserved and underserved areas of the State are set up, shortly. The existing institutions are being strengthened so that the teaching-learning process is improved.

I request the fullest cooperation from all stake holders in higher education in taking the sector forward and in fulfilling the vision and mission of making Tripura a model State.

(Ratan Lal Nath)
